

SARVESH TALEGAONKAR

Mumbai, India | +91 9309947371 | talegaonkarsarves@gmail.com | [LinkedIn](#)

SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience in computer vision, deep learning, agentic AI automation, and web development. Built image segmentation models, explainable medical-imaging applications, REST APIs, and multi-step LLM workflows; skilled in Python and deploying practical AI solutions.

EDUCATION

Shah and Anchor Kutchhi Engineering College

B.Tech in Artificial Intelligence & Data Science

Mumbai, India

2023 – May 2027 (Expected)

EXPERIENCE

AI Automation & Web Development Intern

Sep 2026 – Present

WB4U

- Developing AI-powered automation workflows for lead discovery, business research, lead qualification, and personalized client outreach.
- Building agentic workflow stages for digital-presence analysis, problem detection, service matching, lead scoring, enrichment, and solution generation.
- Contributing to web development, API integration, and deployment of internal workflow tools and business-facing apps.

AI/ML Developer (R&D) Intern

Jan 2026 – Apr 2026

1Accord

Mumbai, India

- Developed and trained a U-Net image segmentation model with a ResNet50 backbone on 1000+ images and corresponding masks for medical imaging solutions.
- Manually created and annotated 200+ images, integrated external datasets (MKGDK), and tuned hyperparameters (learning rate 1e-5) to improve accuracy and training diversity.

PROJECTS

AI Sales Intelligence & Outreach Agent | *LangChain, LangGraph, LLM APIs, Python*

Agentic AI Project

- Designed a multi-agent sales workflow covering target-market selection, lead discovery, duplicate checking, business research, and digital-presence analysis.
- Built decision stages for problem detection, service matching, lead scoring, contact enrichment, deep research, and personalized solution generation and outreach.
- Added human review before sending outreach, with reply routing for interested, follow-up, and rejected leads.

X-Ray AI – Chest Pneumonia Detection | *TensorFlow, Keras, DenseNet121, FastAPI, OpenCV*

Mini Project

- Fine-tuned DenseNet121 via two-phase transfer learning on the Kaggle Chest X-Ray dataset to classify X-rays as PNEUMONIA or NORMAL with confidence scores.
- Integrated Grad-CAM heatmaps for explainability and a 4-check heuristic validation module to reject non-X-ray uploads before inference.
- Exposed a FastAPI `POST /predict` endpoint returning class, confidence, and Grad-CAM overlay, paired with a drag-and-drop web frontend.

MeiboPix – Meibography Analysis System | *Deep Learning, Image Segmentation, OpenCV*

AI/ML Project

- Developed an AI-based medical image segmentation workflow for eyelid and Meibomian gland analysis using deep learning and image processing.

TECHNICAL SKILLS

Programming: Python

AI / ML: Machine Learning, Deep Learning, Computer Vision, Image Segmentation, CNNs, U-Net, YOLO, DeepLabV3, DenseNet121

AI Automation: Agentic AI, LangChain, LangGraph, LLM APIs, Workflow Automation, API Integration

Libraries & Web: NumPy, Pandas, Matplotlib, OpenCV, TensorFlow, Keras, FastAPI, REST APIs

Cloud & Deployment: AWS S3, AWS EC2, Vercel

ADDITIONAL

Languages: English, Hindi, Marathi, German (A1)

Interests: Artificial Intelligence, Agentic AI, Computer Vision, AI Automation, Web Development
